

Tornado 1 is a leaf & branch remover that can work up to 8 t/h.

The upper part of the machine features a vibrating screen which allows the uniform distribution of olives and, with the help of a fan, to separate and expel any foliage to a dedicated collector.

The Tornado 1 machine is also used for the final separation of olives from their branches through a spiral plane.

TECHNICAL FEATURES

Model	5CR/T
Length	3544 mm
Width	1081 mm
Height	2545 mm
Weight	900 kg
Capacity	8 t/h
Construction material	AISI 304
Vac	400
Hz	50 Hz
Supply line	3Ph+Ground
Electric motor	7.5 Kw
