Olive Harvesting Range

Image Product Description

Major Catching Harvest Frame

A PROVEN AND RELIABLE olive harvesting aid in all major

growing areas around Australia. "Collect your olives without damaging the fruit and keep them off the ground". See further information in the reviews **Compare** the Major catching frame to traditional ground harvest nets:

Ground Nets Major Catching frame

- Fruit falls to ground risks being stepped on
 Can be laborious and time consuming to move from tree to tree
- · Holes can allow small fruit to fall through
- Fruit must be transferred from net to cratesFruit is kept off the ground
- Can be maneuvored by one person
- · Catches fruit of all sizes
- The design allows the olives to be drawn to the outside where they are collected in the crate below.(time saving)

EXCLUSIVE TO THE OLIVE CENTRE - Designed & Built in Australia.

The Catcher Consists of:

- A frame of light-weight galvanized steel with wheels to allow for easy manoeuvrability by one person.
- \bullet The catching net-Hooked to the frame around the outside
- -Is UV resistant (which means longer life)
- -Allows the fruit to breathe.
- -Is gentle on falling fruit.
- -Reduces heat problems which occur when using canvas or similar cloth.

Operating the catcher is easy...

Simply push the catcher under the olive tree and tilt forward so the catcher entrance slides around the main trunk and under the bottom branches (this ensures you are not losing any fruit) . For best use, the tree shape would have been pruned with the height of the catchers in mind.

You can reach the olives in the middle of the tree by simply unhooking the mat near you to move closer to the tree.

Available in 5m and 6m models (Diameter of the net)

Recommended for use with $\underline{\text{pneumatic}}$ or $\underline{\text{electric}}$ hand held harvesters.

Make sure you **order your catcher today** as manufacturing can take up to 3 - 4 weeks if not in stock.

 $\label{lick here} \textbf{Click HERE} \ \ \text{to download assembly instructions for the catching frame}$

*** To best care for your frame please ensure you keep out of moisture. Spray with a protective layer to ensure the longevity of the frame if subjecting to high moisture environment.

Description

Olive Catching Net

Olive Harvest net EXCLUSIVE TO THE OLIVE CENTRE - NEW DESIGN Australian Made!

Harvest Season - Catching Net Size:
• Regular + 10m x 4m
• Regular 8 x 3.6m

The Olive Catching net can be ordered in one or two nets. The nets are laid on either side of the tree (if 2 are ordered).

One person on each side of the net makes a very quick assembly to harvest the tree.

The material used is UV-stabilised and knitted HDPE. This means that the material is very strong, durable and will not fray. The material is high-quality shade cloth.

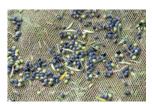

The nets feature on the ends the ability to install a broom handle, so growers will find it easier to move the net from tree to tree.

The material has a 10-year manufacturer warranty.

The catching nets are available in one size. See the specification tab for details. Other sizes can be made upon request.

*** Size of net may vary from specified dimensions as they are handmade.

Description

Electro'liv Electric Olive Harvester -48V Battery Version Electroliv Olive Harvesters by INFACO - High Portability Battery Pack Version

The Electroliv Electromechanical Hand-Held Olive Harvester, features patented elliptical motion technology, stands out as a best-selling solution renowned for its harvesting efficiency and adaptability to all olive varieties. With minimal strain on both the operator and the machine, this innovative harvester ensures a comfortable and ergonomic experience. The extension poles, crafted from lightweight and durable carbon fibre, provide flexibility for harvesting low and tall trees with ease. Spare parts availability adds to the reliability of this harvester, allowing for seamless maintenance. Designed for compatibility with Electrocoup Pruning Tools by Infaco, the harvester ensures a versatile approach to olive cultivation. The balanced weight distribution and low vibration contribute to a stable and smooth operation, making it a preferred choice for olive growers seeking a high-performance, user-friendly harvesting solution.

A key factor in making Extra Virgin Olive Oil is getting your fruit from the tree to the processor in under 4 hours. The Electro'liv harvester enables you to do this by helping you to remove olives in a **timely and cost-effective manner**. Because **no air compressor is required**, pollutants and noise are minimised. You can comfortably operate the machine and talk to others nearby. **Minimal maintenance** is required (although cleaning of the parts is recommended) and there are no ongoing fuel costs.

With its **variable speed control**, the Electro'liv harvester can ensure not to damage the olive tree i.e. new growth and sprigs remain intact whilst the fruit is removed. An advantage of this machine is it **can be used on young olive trees** when the bark is still relatively soft through to maturity and also ensures that the tree is able to put its energy into the next production instead of stressing, as it repairs itself from harvesting damage.

PORTABLE- The lightweight harvester can be supplied with an ergonomic harness and rechargeable battery pack. Standard batteries provide up to 5 hours of work time. A 12v version is also available.

POWERFUL- The Electroliv olive harvester easily removes 100% of green and ripe olives thanks to the generous power of the tool. Also fitted with a balancing system to decrease vibrations to the user.

FLEXIBLE- The olive rake-head can be placed in 6 different working positions. Variable speed allows you to harvest from both young and established trees. Available with fixed 2.5m pole, or telescopic 1.5-2.6m pole. The batteries are also compatible with the Electrocoup Secateurs, and other infaco tools. (Different control box may be required)

Operating The Harvester

In practice, using the harvester is simple. The olives droop to the underside of the branch, the agitating fingers move down the branch (in a combing manner) directing the fruit in a downward action and therefore fall below onto a waiting net or catching frame. The head of the harvester and the unique elliptical movement of the tines covers the zones better to contact and vibrate many branches in a single rake for more efficiency. Also, if the machine is to get tangled in the branches, the machine automatically cuts the power to disentwine itself.

Powercoup PW3 Elliptical Movement Olive Harvester

The olive harvester heads make it possible to optimise olive harvesting times, dividing them by 3 compared to manual harvesting. The elliptical movement of the carbon fingers respects the plant in order to optimise following harvests and reduces the alternating phenomenon. Thanks to this movement, the olives fall less to the sides and are easier to pick up.

- Lightweight and easy to handle
- Silent
- Respect of the plant
- Tool compatibility

V5000P3EF: Static Pole: 2.5m - Weight 3.5kg - Power 720 W - Speed 850 - 1250 RPM

V5000P3ET: Telescopic Pole: 1.5m - 2.6m - Weight 3.9kg - Power 720 W - Speed 850 - 1250 RPM

Limited Dispersal- the elliptical movement olive harvester makes it possible to control the falling and thereby make collection easier. Moreover, there are 10 different speed settings available.

Tool Compatibility- the PW3 is the only multifunctional grip that is compatible with an electric olive harvester, saw, chainsaw and hedge trimmer heads.

Respect Of The Plant- the elliptical movement totally respects the plant and avoids branch snapping.

NOT AVAILABLE IN 2025 HARVEST***

Powercoup PW3 Alternating Movement Olive Harvesters

The latest tool to come out of the INFACO workshops, the V5000P3A olive harvester is a revolution for the olive-growing industry thanks to its modularity and its capacity to adapt to any situation. Using its alternating movement, the V5000PSA olive harvester will be a valuable ally for difficult harvests thanks to its perfect output and comfort of use.

- Ergonomic
- Robust
- Tool Compatibility

V5000P3AF: Static Pole: 2.5m - Weight 3.2kg - Power 960 W - Comb Beats 850 - 1040 / min

V5000P3AT: Telescopic Pole: 1.5 - 2.6m - Weight 3.9kg - Power 960 W - Comb Beats 850 - 1040 / min

Power- the alternating movement olive harvester is comfortable to use and highly effective for your harvesting, there are also 10 different speed settings available.

Output- using the alternating movement olive harvester provides very high output.

MULTI Tool Compatibility- the PW3 is the only motorised unit that is compatible with the electric olive harvester, reciprocating saw, chainsaw and hedge trimmer heads.

Description

Orange Olive harvest crate, full vents - HARVEST SPECIAL

Orange Olive Harvest Crate - Full Vents - Harvest Special

Australian manufactured Industry Standard Item.

These crates originate from Italy to transport the olives to the 'Frantoio' or as we know - the processing plant.

Presenting your fruit before processing in the best possible condition is imperative when trying to receive maximum price per kilogram and produce high quality olive oil.

Features of the crate include:

Vented sides and bottom to allow fruit to breathe (this slows down the deterioration of the fruit).

- Inside vents are smooth which reduces damage to fruit.
- Crates stack securely on top of each other for efficient transporting.
- Bright colours can be easily seen in the grove.
- · Strong, robust design and construction.
- Contains more of the UV stabilizing agent used in manufacturing.
- Designed for easy lifting and carrying.
- Hygienic and easy to clean.
- Can be placed under the Major Catching Frame to catch falling fruit

Measurement: 53cm x 35cm x 32cm (H) Fits approximately 20kgs olive fruit

Main Use

The Orange Olive Harvest Crate is used for collecting, transporting, and storing freshly picked olives during harvest. Its design ensures the fruit remains well-ventilated and protected from pressure damage or overheating before processing.

It is also suitable for other orchard or produce-handling tasks, including fruit sorting, temporary field storage, or placement under catching frames to collect olives directly from tree shakers or mechanical harvesters.

Performance and Handling

The crate's robust build and reinforced base provide excellent stability, even when stacked high on trailers or pallets. Smooth vent openings allow continuous airflow to prevent spoilage while keeping fruit cool. The ergonomic handholds make lifting and carrying easier during long harvest days, reducing strain on workers.

With its UV-protected plastic composition, the crate maintains colour, flexibility, and strength season after season — even under harsh sunlight. It is easy to wash, dry, and reuse, offering long-term reliability and hygiene for professional olive producers.

Why Choose This Crate

The Orange Olive Harvest Crate provides a reliable, purpose-built solution for handling olive fruit during harvest. Its durable, fully vented design protects fruit quality and ensures better oil yield after pressing. Designed for the Australian olive industry, it delivers performance proven through years of grove use and remains the preferred choice for efficient, hygienic harvest operations.

Strong, stackable, and easy to clean, this crate supports growers focused on quality and sustainability — keeping fruit in premium condition from the grove to the processing plant.

Canvas Fruit Picking Bag 0.5bu

Canvas Fruit Picking Bag - 0.5 Bushel

This durable Canvas Fruit Picking Bag has a 0.5 bushel capacity, perfect for picking fruits in orchards and gardens

Features

- Heavy-Duty Canvas for long-lasting use
- Padded Straps for comfort
- Cross-Over Straps for better weight distribution
- Long Exit Chute with steel clips for easy emptying
- Plastic Reinforcement Hoop to keep the bag's opening stable

Hand Olive Harvesting Rakes (set of 5) Hand Olive Harvesting Rakes

Hand harvesting rakes come in a set of 5 only.

A popular inexpensive harvesting tool designed to save your hands when picking olives.

The back end is hollow, allowing it to be attached to a broom handle for harvesting up high.

Delivery within Australia included
