

We manufacture both steel and iron augers. Diameter, weight and flow capacity vary according to customer needs and the type of product to be transported. Augers can be circular with closed tube or U-profile, which can be fully inspected. They are equipped with a loading hopper of variable dimensions, an unloading mouth and a helical spiral directly connected to the gear motor.

TECHNICAL FEATURES	
Model	5TC
Length	VARIABLE
Width	VARIABLE
Height	VARIABLE
Weight	VARIABLE
Capacity	VARIABLE
Construction material	Painted AISI 304 steel/FE
Vac	400
Hz	50 Hz
Supply line	3Ph+Ground
Electric motor	VARIABLE
