

GALAXY 4

The Galaxy 4 is a high-capacity olive pomace processing, capable of processing 18–20 t/h, designed to separate liquid pomace from olive pits. Constructed from stainless steel with precision assemblies, this high-speed rotary machine is compact, quiet, and adaptable to various spaces. Equipped with an automatic washing system and a pneumatic scraper, it ensures continuous cleaning of the drum. Its electrical management system regulates the input flow, optimizing energy consumption for efficient and reliable operation.
