

# HAMMER CRUSHER

The Hammer Crusher is constructed from AISI 304 stainless steel, offering a processing capacity of up to 10 t/h. It features a stainless-steel auger for feeding, three interchangeable hammers, and a self-cleaning, variable-diameter rotating grid. The hammers are arranged in a star configuration, easily replaceable, and securely fixed with screws. Additionally, the mill is equipped with an electro valve for water addition, which aids in diluting the paste and facilitates machine cleaning.

## → TECHNICAL DATA

Capacity (t/h)	3.5   4.5   10
Electric motor (kw)	18   22   30
Material	AISI 304
Model	FR-X-M
Length (mm)	1384
Width (mm)	765
Height (mm)	775
Weight (kg)	245
Voltage (Vac)	400
Frequency (Hz)	50
Power Supply Line	3F+T
